

BVI

Wet-Field® Eraser®

Precise, Targeted Coagulation

BVI offers a range of specialty Eraser® Instruments, multiple options for bipolar pencils, for vitreoretinal procedures and glaucoma filtration. Designed for targeted and discrete coagulation with minimal tissue trauma and minimal peripheral cellular necrosis.

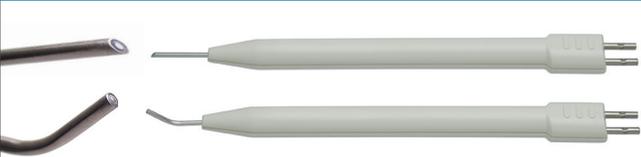

Contoured shafts are designed to conform to ocular anatomy while maximizing tip visualisation, range of motion, and target approach versatility.

Wet-Field® Eraser®

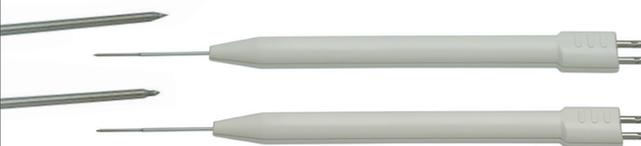

BVI provides clinicians a wide portfolio of bipolar pencils ranging from 18 to 25 gauge, with either straight and angled shafts. Tip options include beveled, blunt, fine, and tapered blunt or fine to provide support for many ophthalmic surgical procedures and conditions. With different shaft and tip options, clinicians can choose what will be applicable for their patient's eye anatomy and anticipated surgical outcome.

Wet-Field® Hemostatic Eraser® Bipolar 18G

Description	SKU #
18G, Bevel tip, Straight, 10/Bx	221250
18G, Blunt tip, Angled 45 degrees, 10/Bx	221251
